

### **CHRIST Lacke investing in RENZMANN cleaning equipment**

On november 24th, 2010, company CHRIST Lacke in Ebelsberg, Austria, installed a new RENZMANN washing machine for vessels. According to Norbert Römmer, managing director, the decision to invest in a RENZMANN machine was based on the facts of best available technology and being ahead by a nose regarding environment friendliness. Using water based alcaline cleaning media ensures even small residues to be taken out of the vessels and therefore enhancing the quality of the lacquer.
